

## **Workshop on Foreign Education**

**Conducted By: Ms. Akanksha**

**Attended By: Students of Class X-XI**

**Venue: ITL Public School**

**Organized By: Manya- The Princeton Review**

An informative workshop by **Manya- The Princeton Review** was held on **Friday, December 2, 2016** to enlighten the students of classes X and XI on the prospects of migrating abroad for further studies. **Ms. Akanksha**, a representative of Manya headed the discussion.

During the workshop, the students were apprised about foreign education and its benefits and were also advised not to limit themselves only to Indian universities, which do not even make it to top 200 global list of universities. They were also told why it was easier to get into a foreign university and get quality education with a globally renowned degree.

The Manya group gave students an insight into the fine details and the ideal amount of time they needed to spend on their applications. The students were given tips on how to score well in SAT, ACT, IELTS, TOEFL and other standardised tests and how Manya, which holds six tests in a calendar year would help in fulfilling their desires.

All queries, fears and apprehensions of the students were addressed and taken care of. Overall the workshop was a big help to the students who are considering a quality higher education.
