| PARTICIPANTS | : | Students of Class IX and XI of ITL Public School. |

‘E-Waste Management’, an ISA initiative undertaken in collaboration with the British Council of India was organized by ITL Public School, Sector-9, Dwarka. The students of classes IX and XI organized a rally and enacted a street play on the topic, “Recycling of E-Waste” with an intent to sensitize people towards this issue. The students marched for this cause in the school premises, in the nearby areas and visited local markets. The students carried placards and banners with slogans to motivate people towards the optimum use of resources and also stressed on the importance of proper disposal and recycling of electronic waste. They performed street plays to enlighten the common people about the hazards of e-waste. The catchy phrases, crisp script coupled with humor and ready appeal helped the group to instantly connect with the general public. The students involved the onlookers in the market to discuss the harmful effects of heavy metals and radiation which are given out by the electronic waste. The students’ efforts were highly appreciated

The activity helped the students to realize that in a consumer driven society, which is constantly buying, upgrading and replacing current technology, the problem of e- waste has attained colossal proportions. They developed a sense of empathy towards people who are facing the hazards of e-waste. They also developed a sense of cooperation and team spirit as they worked on the script together.
