

## PPT ON E – WASTE MANAGEMENT

- DATE** : August 16<sup>th</sup>, 2018  
**VENUE** : ITL Public School, Sec 9, Dwarka  
**ORGANISED BY** : ITL Public School, Sec 9, Dwarka  
**CONDUCTED BY** : Department of Science  
**PARTICIPANTS** : Students of Classes VI and VII of ITL Public School.

As part of the ongoing ‘E-Waste Management’ Drive, an ISA initiative undertaken in collaboration with the British Council of India by ITL Public school, Sector 9, Dwarka, the third day’s activity was designed for the young, impressionable minds from classes VI and VII. It was a group task, wherein the students presented the story of electronic equipment in the form of a visual depiction. The students made the presentation after doing extensive research, and made an effort to compare the statistics with China, UK and Japan. To gauge their learning outcome, a questionnaire was given to them.

The research done by students showed that technology has become an inseparable part of our lives and it is difficult to imagine existence without the electronic gadgets. However, because of rapid technological advancements and reduced replacement rates, the life cycle of electronic products is sharply decreasing. The disposal contributes to serious global environmental health concerns. Only a minute percentage of electronic waste is recycled. The students learnt about the ill effects of increasing e-waste and pledged to do their bit to prevent further degradation of the environment.
